NDEP / REGULATORY NOTES

NDEP-COMPLIANT RECLAMATION SITE

Source-permit framework: aggregate is reclaimed from the Gold Canyon pit, Dayton, NV under an active Nevada Division of Minerals Reclamation Permit. Reclamation bond is current; no new vegetation disturbance on the active footprint.

Processing controls: all four sizes are washed and screened on-site at Gold Canyon. Wash water is settled and reused inside the footprint; sediment is contained on-site with no off-site discharge.

Dust, haul, and documentation: watering and suppression are applied during excavation, screening, and load-out. Haul trucks are tarped on Northern Nevada corridors. Source-permit number, gradation reports, and reclamation status are released on request.
